Parsa Mokhtarpour

Full Stack Engineer (6+ Years) | TypeScript • React • Next.js • Node.js (express/Hono) | Product-Focused Developer
Sari, Mazandaran Province, Iran

Summary

Senior Full-Stack Engineer & Technical Lead (6+ years) specializing in edge-native architecture — Next.js, Hono, Cloudflare Workers/D1. I build high-performance systems from 0-to-1, both as a freelance technical lead for international clients (biotech, energy, healthcare, industrial sectors) and as a founder running my own ventures end-to-end.

4+ years as a core engineer at Apanco, followed by 2+ years of freelance/consulting work — including cross-border engagements with clients in the UK and Canada — spanning solo full-stack builds and leading small teams (2-3 people) as Technical Lead, owning client requirements through to deployment.

Alongside client work, I've founded and operated two food businesses, handling full-stack engineering, digital ordering systems, and business operations (P&L, growth strategy) — currently expanding into ordering and accounting systems for the family business.

I typically manage 2-3 concurrent client engagements as an independent consultant, balancing technical leadership and hands-on development across sectors — standard practice for freelance work, and reflected in overlapping project dates below.

Currently based in Iran, learning German (A2), and actively seeking relocation to Germany for Senior Full-Stack Engineer / Technical Lead roles.

Experience

Freelance

Freelance Full-Stack Engineer & Technical Lead

December 2023 - Present (2 years 9 months)

Sari, Mazandaran Province, Iran

Full-Stack Engineer & Technical Lead specializing in edge-native architecture — Next.js, Hono, Cloudflare Workers/D1. I build high-performance systems from 0-to-1, both as a freelance technical lead for international clients (biotech,

energy, healthcare, industrial sectors) and as a founder running my own ventures end-to-end.

Started as a junior developer at Apanco and grew into a core contributor over 4+ years, then moved into freelance consulting — including cross-border engagements with clients in the UK and Canada — ranging from solo full-stack builds to leading small teams (2-3 people) as Technical Lead, owning client requirements through to deployment.

As an independent consultant I typically run 2-3 concurrent client engagements at a time, balancing technical leadership and hands-on development across sectors — standard practice for freelance work, and reflected in the overlapping dates below.

Alongside client work, I've founded and operated two food businesses, handling full-stack engineering, digital ordering systems, and business operations (P&L, growth strategy) — currently building an ordering and accounting system for the family business.

Currently based in Iran, learning German (A2), and actively seeking relocation to Germany for Senior Full-Stack Engineer / Technical Lead roles.

Self-employed

Founder & Managing Director — Yuumi (D2C Food Venture)

July 2024 - Present (2 years 2 months)

Sari, Mazandaran Province, Iran

Co-founded and run a D2C food venture with my mother (engineering, marketing, and digital strategy; she manages food production). Sole architect of the full-stack ordering platform, including a custom 10% cashback loyalty engine and real-time analytics suite. Directed P&L, supply chain, and digital strategy, achieving profitability through organic growth.

Emarate Nami

Technical Lead & Interim Operations Manager — Emarate Nami (Family Business)

January 2025 - Present (1 year 8 months)

Sari, Mazandaran Province, Iran

Directed the full residential-to-commercial conversion for the family restaurant, managing both physical renovation and technical setup. Built and deployed the custom full-stack ordering platform and digital brand identity. Served as interim Operations Manager for 2 months post-launch, driving a 1.5x–2x revenue increase through menu engineering and workflow redesign. Currently developing a custom ordering and accounting system for ongoing use by the family team now running the business.

Atlas Companies UK

Freelance Full-Stack Engineer & Client Lead

February 2026 - June 2026 (5 months)

London Area, United Kingdom

Sole developer. Gathered requirements directly from client and delivered end-to-end platform — Next.js/TypeScript frontend, Hono/Cloudflare Workers backend, D1 data layer, custom CMS — for a UK energy/infrastructure firm operating across UK, GCC, and Asia.

Divan group

Freelance Technical Lead & Full-Stack Engineer

September 2025 - December 2025 (4 months)

Sari, Mazandaran Province, Iran

(Construction & Iron Industry) Led a small team while personally developing the complete platform (Next.js/Hono on Cloudflare Workers, GSAP animations) end-to-end. Translated heavy-industry requirements into a scalable technical roadmap.

BioSam Inc.

Freelance Technical Lead & Backend Engineer

March 2025 - September 2025 (7 months)

Quebec, Canada

Led a small team; owned client requirements and backend architecture (Hono/Cloudflare Workers, D1/Drizzle) while directing frontend implementation. Delivered an investor-ready biotechnological data platform with sub-second global latency, in a cross-border engagement.

Mana Medical Tools

Freelance Technical Lead & Backend Engineer

April 2025 - April 2025 (1 month)

Sari, Mazandaran Province, Iran

(Healthcare & Medical Equipment) Led a small team; engineered a high-availability Hono/Cloudflare Workers backend with D1, building a B2B "direct-to-consultant" pipeline in place of traditional e-commerce flows.

Avin Quality Arman

Freelance Technical Lead & Backend Engineer

March 2025 - April 2025 (2 months)

Sari, Mazandaran Province, Iran

(Engineering Inspection & Lab Testing) Led a small team; engineered a core API and state machine automating technical inspection lifecycles, plus

secure lab data ingestion pipelines with RBAC, while directing frontend implementation.

Apanco

Full-Stack Developer

October 2019 - December 2023 (4 years 3 months)

Sari, Mazandaran Province, Iran

Joined as a junior developer and grew into a core contributor over 4+ years, working across a suite of enterprise web applications. Handled production troubleshooting and bug fixes, contributed to refactoring legacy JavaScript into more modern patterns, and worked on RESTful API integrations as business requirements evolved.

Education

BNUT - Babol Noshirvani University of Technology

Bachelor of Engineering - BE, Computer Engineering · (September 2016 - September 2022)
